Supporting eLearning at HKU

The Libraries’ Role
Paving our directions

HKU Strategic Themes for 2009-2014

eLearning Strategy at HKU
To further our vision, we will focus our activities around the following three strategic themes for 2009-2014. These include our global and regional competitiveness and our engagement with our community of excellence.

- **Enhancing the Student Learning Experience**
- **Promoting Knowledge Exchange and Demonstrating Leadership in Communities across the Region**
- **Supporting Research and Innovation**

**HKU Strategic Themes for 2009-2014**

- Enrich the **educational environment**
- Enhance **student support**
Operational priorities

• Through providing a **virtual learning environment** that complements and enhances the experiential and face-to-face modes of learning, we will provide **a richer and more diverse learning experience** for our students.

• Through seminars, workshops and training courses, we will support the **professional development of our teachers**, and emphasize dedication to teaching and commitment to caring for students.
eLearning Strategy at HKU

eLearning Pedagogical Support Unit

About the eLearning Pedagogical Support Unit

The eLearning Pedagogical Support Unit (EPSU) is located within the Centre for the Enhancement of Teaching and Learning and functions to support the University of Hong Kong in realizing its strategic aims with respect to eLearning.

Philosophy

The EPSU operates according to the philosophy that the educational process must be learning led and technology enabled. This philosophy is commensurate with an Outcome-based Approach to Student Learning (OBASL). In practice being learning led means focusing on student learning and intended learning outcomes and using technologies only when they can improve the learning process.

http://www.cetl.hku.hk/elearning-pedagogical-support-unit
Aim of eLearning Strategy at HKU

• Enhance student learning through the creative, appropriate and effective use of technologies
  – Use of technologies as a tool to enrich the quality of learning
  – Open up new possibilities for learning
Goals related to library

• ... technologies are systematically and ubiquitously embedded in the physical environments ... to allow easy access to the Internet and to enable collaborative learning

• ... to integrate technologies into their teaching and learning activities, curriculum resources and assessment
HKU Libraries Objectives (2011-2014)

• Guarantee access to a rich and diverse base of knowledge resources that serve to enhance the University’s academic programmes.

• Provide services that support the full range of scholarly activities on campus and beyond and facilitate user independence.

• Ensure inclusive and diverse physical and virtual environments that enable active, independent and collaborative learning.
**Information Resources**

- **Subject coverage:** Disciplinary, multidisciplinary, interdisciplinary

- **Various formats:** Text, images, audio, video

- **Available online:**
  - 48,000 electronic journals,
  - 2.9 million e-books,
  - 700 databases

The HKU Libraries through its digitization projects, has opened up online access to local collections originally in print format only. The first HKUL Digital Initiative, ExamBase, was launched in 1996 and other projects of scholarly interests were subsequently introduced. More digital projects are being developed to provide continuous access to digital content and services.

Linking or embedding information resources in learning platforms

Professional support to our teachers

Linking to HKU Libraries e-resources

To facilitate student access to the library e-resources, faculty members can either link the materials in Moodle or create an Online Course Reserve in the library catalogue.

Materials available for Moodle integration are not limited to journal articles or ebooks. Extensive e-resources in multimedia format, such as streaming videos or music, can also be linked for student access. In linking these resources, please follow the instructions at Online Reading List. This will trigger the HKU Library authentication to allow off-campus access. Remember to test the URL prior to releasing the web page.

For Online Course Reserves, faculty members can simply fill out the Reserve Materials Request Form. Readings under that course will become searchable in the library catalogue by course title/ code or the instructor’s name.

Students wishing to explore further beyond the course materials can visit the Electronic Resources webpage or the LibGuides page. These websites provide the gateway to a wide spectrum of databases, either of multidisciplinary nature which would suit undergraduates in general or on specific subject areas for in-depth discovery of information. LibGuides, in particular, are focused on bringing together an array of course specific resources and services as well as an introduction to each specialist librarian in each discipline.

To learn how to use these resources, you are most welcome to attend our library courses or Ask a Librarian.

User training

• Face to face
  – Endnote workshops
  – 114 sessions in 2010/11 attended by 2,400 users

• Online
  – Support and training at lib.hku.hk/endnote

• Training raises awareness of plagiarism and correct citation methods
HKU has signed a site licence agreement with EndNote, which permits all current HKU staff and students to use the software both on campus and at home. Upon accepting the agreement in the request form, HKU staff and students must abide by the Conditions of Use of the EndNote software.

**What is EndNote?**

EndNote is a bibliographical management software package designed to help you to organize bibliographic references and create a bibliography. Endnote allows you to search, retrieve relevant citations, and builds your bibliography, all within one program.

What is Turnitin?

Turnitin offers Originality Checking on students' work for proper citation or potential plagiarism. Once a paper is submitted to Turnitin, it will compare with documents in a continuously updated database consisting of current and archived web pages, millions of student papers worldwide, and collections of newspapers, magazines, scholarly journals, e-Books and e-Texts.
