Managing Research Profiles

David T Palmer
The University of Hong Kong (HKU)
Seminar Programme – Earth Sciences
ResearchGate, Impact Story, ResearcherID, Scopus, WoS, MS Academic Search, ACM Digital Library, RePEc, SSRN, and more!

➤ How many research profiles on different web sites must you make?

➤ Why not one only, and let it redistribute as needed?

➤ Several important pieces now, but we’re not there yet.

➤ The quest continues:
Today's Trek

1) Input once:
   - re-use
   - re-distribute
   - re-purpose

2) hku tools

3) Academic Search Engine Optimization (ASEO)

Orcs
The HKU Scholars Hub is the institutional repository of The University of Hong Kong. As a key vehicle of HKU's Knowledge Exchange Initiative, The Hub strives to make HKU authors and their research very visible, with the goal of increasing all forms of collaboration.

HKU has signed a site licence agreement with EndNote, which permits all current HKU staff and students to use the software both on campus and at home. Upon accepting the agreement in the request form, HKU staff and students must abide by the Conditions of Use of the EndNote software.

**What is EndNote?**

EndNote is a bibliographical management software package designed to help you to organize bibliographic references and create a bibliography. Endnote allows you to search, retrieve relevant citations, and builds your bibliography, all within one program.

Choose Open Access Publishing

- Gold, author or funder pays APC to publisher (avg. US$3,000)
- Green, author or university reposts “author’s manuscript” in open access repository ➔ The HKU Scholars Hub
  - Free
  - More than 65% of journal publishers allow this

OA articles receive more citations

- How much is a citation worth?
2: Consider relevant (weighting) in Page Ranking

- Title, more than Abstract
  - Abstract
    - Keywords
      - Sub-headings
    » Text more
    - tables & figures

- Number of citations, including self-citations
  - When self-citing, always include the URL, so that robots can follow and index your other articles

- Author name & Journal Title, are heavily weighted.
  - Ex. 74 out of top 100 results on a search for “Arteriosclerosis and thrombosis cure” retrieved articles from the journals, a) Arteriosclerosis, Thrombosis, and Vascular Biology”.
  - So choose journal title wisely
3. Consider Indexing

- Use vector graphics and not raster graphics (jpg, gif, etc)

- Use synonyms
  - Ex. “academic search engine” vs. “scientific paper search engine”

- Does do stemming:
  - Ex., “analyse”, “analysis”, etc.

- Shorter titles more than longer titles

- Always, always, use the same form of author name!
4. Choose the best keywords

• Tools
  – Google Trends
  – Google Insights
  – Google Adwords keyword tool
  – Google Search-based keyword tool
  – Spacky

• Consider less common keywords
  – Less competition
Three Rubgs for the Elven-kings under the sky,
Seven for the Dwarf-lords in their halls of stone,
Nine for Mortal Men doomed to die,
One for the Dark Lord on his dark throne
In the Land of Mordor where the Shadows lie.

One Ring to rule them all, One Ring to find them,
One Ring to bring them all and in the darkness bind them
In the Land of Mordor where the Shadows lie
