Web Services to Integrate with Workflow

Institution automatically creates RID profiles

- Unique identifier for each researcher
- Researchers maintain control of information and privacy
- Current updated Web of Science citation counts into institutional repositories and systems

Updated citation counts, profile and publication data flow into institutions

HKU
港大
Searching the Author Identifiers Field

Enter one or more ResearcherID numbers or ORCID identifiers to search the Author Identifiers table within a Full Record. For example,

- Entering A-1009-2008 finds all records of publications that appear in this person's publication list in ResearcherID.com.
- Entering 0000-0003-3768-8390 finds all ORCID records.

Do not use a wildcard (* ? $) in your search query as the system may return unpredictable results.

Full Record

After you perform your search, go to the Full Record page to check the Author Identifiers table. The table displays:

- The RID numbers (if available) of all authors found by the search who have registered with ResearcherID.com. The hyperlink takes you to the author's Profile in ResearcherID.com where you can view all the records in the author's publication list.
- The ORCID ID (if available) of all authors who are currently associated with the RID account.

About ORCID®

The Open Researcher and Contributor ID (ORCID, Inc.) is a non-profit organization that aims to solve the author/contributor name ambiguity problem in scholarly communication by creating a central registry of unique identifiers. These identifiers can be used within various systems you may interact with in your professional research workflow, including manuscript submission.

ORCID provides a persistent digital identifier that distinguishes you from every other researcher, which facilitates proper recognition of your work.
ORCiD

- Open Researcher & Contributor ID
The problem

The research community has lacked the ability to link researchers with their professional activities.

As a researcher, you want to

- ensure your work is discoverable and connected to you throughout your career;
- minimize the time you spend entering repetitive data online; and
- eliminate name ambiguity, distinguishing you from other researchers and ensuring proper attribution.
How can ORCID help?
ORCID provides you a unique and persistent personal identifier that connects you and your research activities throughout your career.

More than 430,000 IDs issued to date
Registry use is international

Open, non-profit, community-driven organization
Website and registry localization for multiple languages in process
What does an ORCID page look like?

JH Bacon-Shone
http://orcid.org/0000-0002-9827-1815
Also known as: 白景崇
Keywords: Compositional data, Gambling, Immigration and population policy, Privacy policy, Telephone survey methodology
Websites: My Researcher Page Google Scholar Citation

Registration is free and fast

Registration is easy. Signing up for an ORCID iD only takes seconds. Then, enhance your ORCID record with your professional activities and begin to use your ORCID iD as you submit publications, apply for grants, and in any research workflow to ensure you get credit for your work.

Register for an ORCID iD
You control the privacy

You determine what, how, and with whom the information in your ORCID record is shared.
For benefits to be realized...

Researchers must claim and use ORCID iDs

Research information processes and systems must embed ORCID iDs and link back with the ORCID Registry
Benefits to Researchers
Funders are embedding ORCID identifiers in their grant submission systems and awardee databases.

Opportunities for integration with:
- Researcher profile systems
- Institutional repositories
- Grants & contracts
- HR systems
- Safety/research conduct training & compliance

Associations are integrating into membership renewal, publishing and meeting registration processes.

Publishers are integrating into manuscript submission and author/reviewer databases.

Repositories linking with deposition, search and updating.

Both are linking internal ID with ORCID record.

Improve discoverability & reduce repetitive data entry
More than 100 organizations to date are working with ORCID to integrate into their systems

**Publishers**

updated 4 Dec 2013
Tell the full story of your research impact.

ImpactStory aggregates altmetrics: diverse impacts from your articles, datasets, blog posts, and more.

Reduce time-consuming data entry & activity reporting

Make my impact report  or, show me a sample report
Eliminate name ambiguity
Connect your ORCID iD

IMPORT RESEARCH ACTIVITIES

ORCID has been working with many member organizations to make it easy to connect your ORCID iD, and import information from their records. Choose one of the imports wizards to get started.

Scopus to ORCID
Import your Identifier, profile and publications. The wizard helps you find the correct Scopus profile and to confirm your publications. You can then import the identifier and list of publications into ORCID. Any changes you make will be submitted to the Feedback team to update your Scopus profile.

CrossRef Metadata Search
Search CrossRef's comprehensive metadata on journal articles, conference proceedings and monographs. Easily add search results to your ORCID profile.

Don't see what you are looking for?
2. Connect your ORCID iD: manually add works

UPDATE WORKS

We've found publications with your name in the CrossRef database. Click to add your works to your record.
Also see Import Research Activities

Add manually

Some of your works may not be included in the search results. You can add them manually here.

Title
Add the full title here *

Citation Type
UNSPECIFIED

Works in your ORCID record

'But I Have No Skills' Aug-2005
http://chronicle.com/article/But-I-Have-No-Skills/44924

A Ph.D. and a Failure Mar-2005
http://chronicle.com/article/A-PhDa-Failure/44884/
Megan Pincus-Kajitani and Rebecca Bryant, A Ph.D. and a Failure, Chronicle of Higher Education (March 24, 2005).

Save changes
2. Connect your ORCID iD: link to other identifiers

Associate your ORCID iD with ResearcherID

Exchange profile and/or publication data between ORCID and ResearcherID
3. Use your iD: grant applications

- **Link grant application to ORCID identifier**
- **Import information from ORCID record**
3. Use your iD: manuscript submission
3. Use your ORCID iD: linking to datasets

You can now link your ORCID iD with your data, enabling you to display your datasets in your ORCID profile.

New ORCID-integrated data citation tool

Posted May 13, 2013 by Guðmundur Thórason & filed under Uncategorized.

We are pleased to announce the beta launch of a new service for searching and claiming works in DataCite:

http://datacite.labs.orcid-eu.org

The tool enables users to search the DataCite Metadata Store for their works, and subsequently to add (or claim) these research outputs – including datasets, software, and other types – to their ORCID profile. This should increase the visibility of these research outputs, and will make it easier to use these data citations in applications that connect to the ORCID Registry. ImpactStory is one of several services already doing this.

The new service also provides formatted citations in several popular citation styles, supports COinS, links to related resources, and displays the attached files.

Creative Commons license where this information is available. In addition to datasets, the DataCite Metadata Store of course also contains many text documents from academic publishers and services such as figshare or PeerJ.
3. Use your iD: IR / CRIS Integration
The University of Hong Kong ORCID Record Creation

In October 2013, The University will create ORCID records for HKU faculty that now have a HKU ResearcherPage in The HKU Scholars Hub — usually staff with UGC status of A ~ I, sometimes O. These faculty could choose to opt-out and no ORCID will be created for them. If you already have an ORCID record, please click “Provide Existing ORCID” to allow us to associate your HKU ResearcherPage with your ORCID identifier.

If you prefer to manually create your own ORCID record, you may click on, “Go to ORCID, Manually Create”. After you do so, could you please return to this page, and click on “Provide Existing ORCID”, and input your new ORCID ID there.

Other HKU faculty and students wishing an ORCID record can also go to ORCID and manually create one for themselves.

Please note that publishers have begun asking for ORCID identifiers during the manuscript submission process, and there are several benefits to getting an ORCID ID, which will follow you throughout your scholarly career. For more information visit http://hub.hku.hk/orcid/about.jsp.

Provide Existing ORCID  Opt-Out of ORCID  Go to ORCiD. Manually Create

### Title
Gabapentin: A multimodal perioperative drug?

### Authors
- Kong, VKE
- Irwin, MG

### Issue Date
2007

### Publisher
Oxford University Press. The Journal's web site is located at http://bja.oxfordjournals.org/

### Citation
British Journal Of Anaesthesia, 2007, v. 99 n. 6, p. 775-786 [How to Cite?](http://dx.doi.org/10.1093/bja/aem316)

### Abstract
Gabapentin is a second generation anticonvulsant that is effective in the treatment of chronic neuropathic pain. It was not, until recently, thought to be useful in acute perioperative conditions. However, a growing body of evidence suggests that perioperative administration is efficacious for postoperative analgesia, preoperative analgesia, attenuation of the haemodynamic response to laryngoscopy and intubation, and preventing chronic post-surgical pain, postoperative nausea and vomiting, and delirium. This article reviews the clinical trial data describing the efficacy and safety of gabapentin in the setting of perioperative anaesthetic management © The Board of Management and Trustees of the British Journal of Anaesthesia 2007.
