HKALL(港書網), Hong Kong Academic Library Link(香港高校圖書聯網), is a project initiated by the academic libraries of eight local tertiary institutions, listed in the left sidebar.

Implemented in [INN-Reach](#) software from Innovative Interfaces and running on a Sun server, HKALL is a union catalogue allowing the students and staff of the eight partner institutions to search monographs (11M+ volumes) held in the eight participating libraries. They can make direct requests for materials delivered to the libraries of their respective institutions for further checkout. In cases where HKALL, current students and staff may be able to go to that library personally to use the item at the circulation desk for further details. The map links on the left hand side of this page are provided unique with its large number of Chinese items, and its high number of transactions; in 2010 it was the most used system in the world.

[Find out more](#) about HKALL

Each of the eight libraries has specific rules and procedures for HKALL. Please refer to the following links:
