

Managing All Research Information in an IR

David T Palmer
The University of Hong Kong (HKU)
Seminar Kebangsaan Sumber Elektronik Di Malaysia

Institutional Repository (IR)

Definition

→ **IR: What is it?**

- “An **institutional repository** is an online locus for collecting, preserving, and disseminating - in digital form - the intellectual output of an institution, particularly a research institution” -- Wikipedia (November 2012)
- Academic Institution: journal articles, theses, learning objects
 - → Publications
- Why?
 - Provide Open Access
 - Create global visibility
 - Collect content in a single location

**Current Research Information System
(CRIS)
a.k.a. Research Information
Management System (RIMS)**

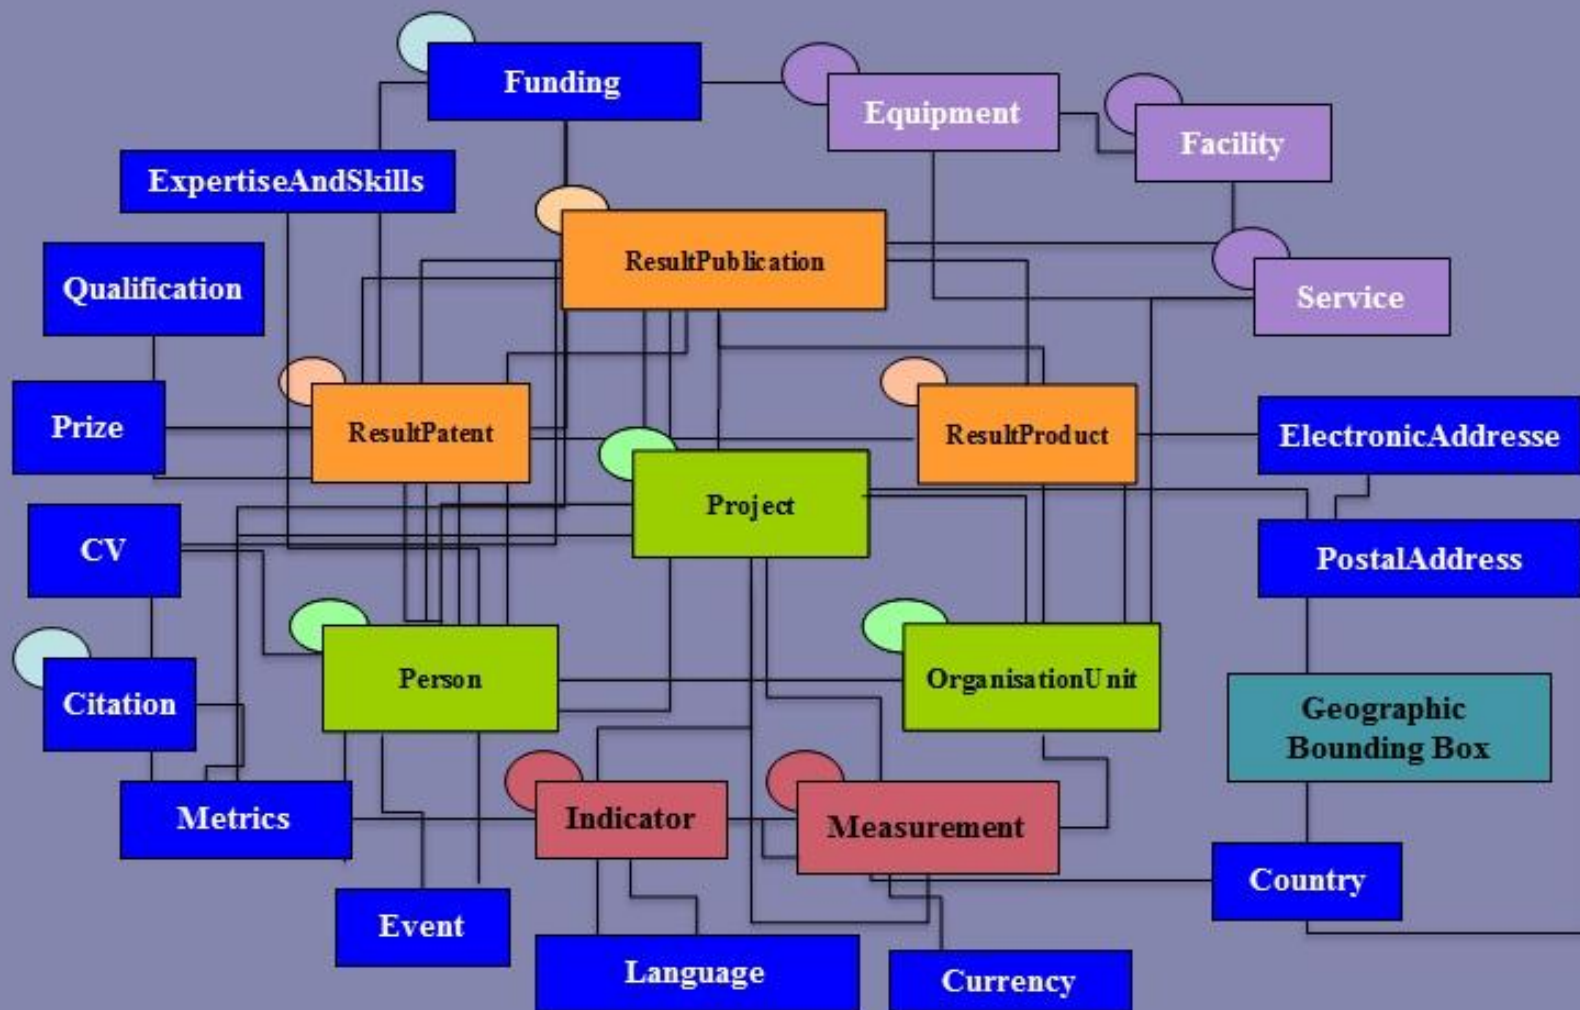

Definition

→ **CRIS: What is it?**

- “A Current Research Information System, commonly known as "CRIS", is any information tool dedicated to provide access to and disseminate research information, such as People, Projects, Organizations, Results (publications, patents and products), Facilities, and Equipment.” – “EuroCRIS”, Wikipedia (Nov 2012)
- for researchers: easy access to relevant information
- for research managers and administrators: easy measurement and analysis of research activity
- for research councils: optimisation of the funding process
- for entrepreneurs and technology transfer organizations: easy retrieval of novel ideas and technology in a knowledge-assisted environment and easy identification of competitors and previously done similar research
- for the media and public: easy access to information, software and computer power to allow easily-assimilated presentation of research results in appropriate contexts.

CERIF 1.3 Entities (Types in Colors)

→ **CRIS flavours**

- Internal only?
 - Research support
- Public also?

- Built in one integrated whole?
- Distributed, with APIs calling on-the-fly, other databases

→ The HKU Scholars Hub

- 2005 begun,
 - Publications
 - Open Access
- Not compelling with faculty
- 2009 “Knowledge Exchange”
 - New funding, from HKU KEO
 - New interest, from faculty
- An exchange of research and skills between HKU and its community for mutual benefits
- A database or exchange hub to enable, facilitate and measure HKU’s KE

The HKU Scholars Hub is the institutional repository of The University of Hong Kong. As a key vehicle of HKU's [Knowledge Exchange Initiative](#), The Hub strives to make HKU authors and their research very visible, with the goal of increasing all forms of collaboration.

Do you want to see your publications in the Hub?

Title 360-deg profilometry: new techniques for display and acquisition		
Authors Asundi, A Chan, CS Sajan, MR		
Keywords Profilometry Logical moire Phase shifting Scanning moire structured light Projected gratings		
Issue Date 1994		
Publisher S P I E - International Society for Optical Engineering. The Journal's web site is located at http://www.spie.org/oe		
Citation Optical Engineering, 1994, v. 33 n. 8, p. 2760-2769 [How to Cite?] DOI: http://dx.doi.org/10.1117/12.176507		
Abstract Two optical methods are proposed for shape measurement and defect detection of curved surfaces in the form of a complete 360- deg profile of the object. The first one is the standard structured light approach. Display of the resulting data is the emphasis of this section. The second approach uses modulated structured light with a scanning digital camera for faster and simpler data acquisition. Quantitative processing is done off-line while real-time moire produces enhanced display of the defects for qualitative analysis.

[蕭亮輝](#)**Issue Date** 2011**Publisher** University of Hong Kong (Pokfulam Road, Hong Kong)

Abstract The definition and quantification of urban heat island (UHI), the air temperature differences between urban and rural areas, remains problematic. This is due, in large part, to the difficulty of operationalizing the terms "urban" and "rural", especially with regard to classifying the weather stations that provide data. This thesis studies the urban heat island (UHI) intensity in Hong Kong and there are three foci in the research. The first focus of this study is the determination of the urban and rural weather stations in Hong Kong. The Local Climate Zones (LCZ) system has been employed to classify 17 weather stations and field observation was the main technique to collect the necessary metadata. Six field trips were arranged in the summer of 2009 and 2010. Hong Kong Observatory Headquarters (HKO) is considered as the only representative urban station, whilst Tsak Yue Wu station (TYW) is deemed as the representative rural station because of its Forest Zone (NCZ1) classification. Ta Kwu Ling station (TKL) is another reference rural site. The second focus is the quantification of the UHI intensities at six pairs of stations in Hong Kong and their diurnal and seasonal variations. The 19-year annual UHI intensities in Hong Kong suggest that the representative rural sites (TYW and TKL) also record representative UHI intensities for the region. The differences of the cooling rate at urban and rural stations drive the diurnal cycle of urban heat island. The seasonal variations of UHI intensities are also driven by the cooling rate differences of urban and rural stations in different seasons. Since the mean maximum urban cooling rate does not vary considerably throughout the seasons (0.4 – 0.5 °C/hr), it is the alteration of the rural cooling rate (1.0 – 1.6 °C/hr at TYW; 0.9 – 1.2 °C/hr at TKL) which determines the seasonal variations of UHI intensities. The mean daily maximum UHI intensities in Hong Kong are greatest in winter. The final focus is the meteorological impacts on the UHI intensity in Hong Kong. Five meteorological elements, including air temperature, wind speed, vapour pressure, cloud cover, and cooling rate, have been separately investigated to establish their impacts on the UHI intensity. Under fine weather conditions, the first four elements are negatively related to the UHI intensity. Sixteen regression models were built after the use of stepwise procedures which optimize the combination of independent variables. Rural air temperature is considered the most important meteorological factor on the UHI intensity. The models also suggest that there are other factors affecting the UHI intensities in spring and summer.

Grants (Projects)!

Grant: Reinforced concrete coupling beams with embedded steel plate

General Research Fund (GRF)

- Application
- Eligibility
- Types of Research

Academic Research

- i. Basic research - research for the sake of advancing the frontiers of knowledge regardless of whether it would provide immediate benefit to mankind; and
- ii. Applied research - efforts directed at meeting certain functional requirements which involve the application of theories to specific areas or for specific purpose, and/or enhance man's existence in the short to medium term.

Contact Research

Efforts which would lead to the delivery of a product or process and could involve both basic and applied research, though the latter is much more prevalent. Contract research is client-specific and is generally sponsored and financed by the client who can be either a private company or a public body or the Government.

Criteria for Consideration of Competitive Bids

Basic View	XML View
Project Title	Reinforced concrete coupling beams with embedded steel plate
Principal Investigator	Su, Kai Leung ❖
Co-Investigator(s)	Pam, Hoat Joen ❖
Funding Year	2003/2004
Amount	25000
Start Date	01-10-2003
Expected Completion	30-09-2005
Status	On-going
Sponsor	RGC Projects (Block Grant)
Grant Type/Funding Scheme	Merit Award for RGC GRF Funded Projects
Duration	24
Objectives	N/A
Publication	Effects of shear connectors on plate-reinforced composite coupling beams of short and medium-length spans
Publication	A survey on axial load ratios of structural walls in medium-rise residential buildings in Hong Kong
Publication	Seismic behaviour of slender reinforced concrete shear walls under high axial load ratio
Publication	Experimental study on embedded steel plate composite coupling beams
Publication	A brief summary of parametric study of plate-reinforced composite coupling beams
Publication	Strengthening of reinforced concrete coupling beams by bolted steel plates
Publication	The effects of shear connectors on plate-reinforced composite coupling beams
